***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-3, 5-11 and 13-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claims 1 and 11 recite the broad recitation "a material having an index of refraction substantially the same as that of corneal tissue", and the claim also recites "the index of refraction in the range of 1.36 to 1.39" which is the narrower statement of the range/limitation.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3, 5-11 and 13-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Barrett et al. (U.S. Patent 5,336,261).

Barrett et al. disclose a corneal inlay lens having a body form from a material with an index of refraction substantially the same as that of corneal tissue; the body having two surface and joining each other at the periphery of the lens; and the thickness of the edge being less than about 15 micrometers as is claimed (figure 1B and 2A, column 4 lines 55-68 and column 6 lines 1-14, 47-53).

Please note that the invention of Barrett et al. does not teach away from using materials with low refractive index but teach that by reducing the size of the corneal inlay, various materials can be used without adverse side effects cause by using larger lenses.
